TV Viewing Made Easy

The doctors just returned from the American Academy of Audiology's national convention in San Diego. They were able to evaluate and try out the latest equipment in the treatment of hearing loss.

The Hearing Center now has the TV EARS system, which includes:

1. A high definition TV, with automatic transmission of amplified sound to TV EARS headsets. No transmitter required!!
2. Full channel capability.
3. A built-in BlueRay DVD player.
4. Installation in your home AS PART OF THE PROCESS

This TV works with TV EARS you may already own, and can also work with the TELEPHONE COIL included on most of the hearing aid systems we sell.

Call our office at (510) 537-4211 for a brochure and pricing information. Demonstrations are available in the Castro Valley office.
